

BEECHER INVESTORS, INC.

EQUITY INVESTMENT PROCESS

Beecher works to maximize the after-tax wealth of its clients through a disciplined investment process.

We seek to buy great companies at reasonable prices.

By holding for the long-term, clients defer tax payments on unrealized gains, allowing those deferrals to continue to work for the investor's benefit.

The ideal investment is a company with a differentiated business model that is transforming its industry. Such investments may produce attractive returns over extended periods of time, combining the benefits of tax deferral with above market-performance.
